LEGALTEK LXFUSION (LXF) M-SERIES

1080P HIGH DEFINITION INTERVIEW RECORDING SYSTEM

- *Sony G Lens Optics... Unmatched Low Light Recording*
- *Microphones with Active Noise-Cancelling Technology*
- *Simple Touchscreen Control...Rapid Direct/Wi-Fi File Transfer*
- *Embedded Time/Date/User Metadata File Authentication*
- *>24-Hour Battery/AC Mains Operation Without Recharging*
- *Standard Video Format...No Special Software or CODECS*
- *Files are Compatible with most Case Management Software*

KEY FEATURES...

Latest Technology – *Legaltek* brings together cutting-edge technology and design into a broadcast level high-definition recording system that fits in the palm of your hand. Recordings are stored directly to internal solid-state memory. Exclusive embedded time/date/ watermarking also allows users to enter important case information, which is also stored as metadata.

Superior Audio – Four lapel/table microphones with active noise cancelling circuitry, effectively gather important conversation even in an uncontrolled environment. *LXF* can easily capture voices 10 meters away and whispers from across the room with its internal mic array.

Simple Touchscreen Control – Easy to set-up and intuitive to use, the *LXFusion* requires little or no training to set-up or operate. The bright touch screen display controls all system functions, which include both scalable high definition video recording as well as still frame capture.

Compact and Rugged Design – Housed in a splash and dust resistant protective metal shell, the *LXF* is unbelievably light, and well balanced. Its intuitive design, compact size and maintenance free operation make it the go-to recorder for most in-field interview scenarios. *LXF* systems are shipped as complete, pre-configured kits, which contain all components and interconnect cables for both portable and stationary operation.

Record All Day – With its high capacity battery and internal solid-state memory, *LXFusion* can operate >24 hours without recharging. Content is captured in the industry standard H.264/MPEG-4 format, ensuring that recordings can be played by the viewer's choice of application. With its 50% smaller file size, H.264 recording makes archival storage affordable.

Lightning Fast File Transfer – *Legaltek's* file import and processing software is included. The application allows users to quickly transfer files to a computer with the supplied mini USB cable or via lightning fast 802.11AC WiFi link. Once exported, files may be converted to any format for duplication, discovery or presentation. Files are compatible with most enterprise case management software.

Our technical group has provided purpose-engineered solutions for Child Advocacy Centers, law enforcement professionals and government entities for over 25 years.

- No License Fees
- Unlimited Users
- No Charge Software Upgrades
- One Year Factory Warranty
