LEGALTEK LXFUSION (LXF) M-SERIES

1080P HIGH DEFINITION INTERVIEW RECORDING SYSTEM

- *Sony G Lens Optics... Unmatched Image Quality*
- *Embedded Time/Date/User Metadata Authentication*
- *Simple Touchscreen Control...Rapid Direct File Transfer*
- *Built-in Microphones with Active Noise-Cancelling Technology*

“Your High Definition Interview Recording Solution...”

Learn More About the LX Fusion...

LX FUSION is a reliable, cost effective portable/mobile high definition video recording system that is simple to set-up and operate. Systems are shipped as pre-configured easy to use kits.

Key Features...

Compact and Rugged Design – Housed in a splash and dust resistant protective metal shell, the maintenance free LXF is unbelievably light, thin and well balanced. Its intuitive design and compact size make it the go to recorder for most in-field interview scenarios.

Simple to Operate – The recorder is remarkably easy to use. All functions are controlled by the AMOLED touchscreen display. Simply tap the image capture button to begin and end recordings. Focused Video Stabilization reduces issues with camera shake and motion blur. The camera captures both still images and video.

High Definition...and Beyond – LXF features Sony's new, next generation 12.3 M-pixel EXMOR image sensor fitted with a professional-quality 2.3mm optical glass lens. The recorder captures sharp, detailed images with brilliant color reproduction. Low light performance is second to none.

Record All Day – With a high capacity battery and internal solid-state memory, the LXF can operate >24 hours without recharging. Content is captured in the industry standard H.264/MPEG-4 format, ensuring that recordings can be played by the viewer's choice of application. The resulting 50% smaller file size makes archival storage affordable.

Embedded Time/Date/Metadata Authentication – Recordings are protected by individual frame watermarking and a permanent visual time/date/user-data overlay for both reference and air tight authentication.

Superior Audio – An array of three internal microphones with active noise cancelling technology effectively gathers important conversation, even in an uncontrolled environment. LXF can easily capture voices 10 meters away and whispers from across the room.

Security – Each LXF is assigned a unique multi-digit access code linked to the recorders serial number. If the recorder is lost or stolen, the device cannot be accessed by unauthorized users.

Lightning Fast File Transfer – File import and processing software is included. The application allows users to quickly transfer files to a computer with the supplied mini USB cable. Once exported, files may be converted to any format for duplication, discovery or presentation.

LXF M-Series HD In-Field Recording Kit

The *LX FUSION* Interview/Meeting HD Video Recording Kit includes the LXF HD recorder, tripod, equipment field pouch, active audio processor/interface, multi-channel audio mixer, four omni-directional condenser microphones, four balanced XLR microphone cables, interconnect cables and power bank battery/power supply housed in a waterproof ballistic nylon transport case.

LEGALTEK IS DEDICATED TO...

Quality...

Legaltek brings together cutting-edge technology in a broadcast level high-definition recording system that fits in the palm of your hand. The LXFusion allows agencies to bring high-definition recording capability with them anywhere.

SECURITY...

Recordings are stored directly to internal solid-state memory. Legaltek's exclusive embedded time/date/ watermarking also allows users to enter important case information, which is also stored as metadata.

SIMPLICITY...

Easy to set-up and intuitive to use, the LXFusion requires little or no training to operate. The bright touch screen display controls all system functions, which include both scalable high definition video recording as well as still frame capture. Legaltek's automatic file import and processing software is included.

RELIABILITY...

Housed in a metal, dust and water resistant protective shell, the maintenance-free LXFusion records HD video in the universally compatible H.264/MP4 format, which equals up to 50% smaller file size. The recorder is capable of >24-hour operation without recharging.

VALUE...

LXF systems are shipped in pre-configured kits, which contain all components and interconnect cables. The LXF (M-Series) is best suited for In-Field Interviews, Witness Conditional Examinations, Meetings, Hearings and Conference Recording.

INTEGRITY...

Legaltek's technical group has provided purpose-engineered solutions for law enforcement professionals and government entities for over 20 years.
